ABOUT US

Our company was established in Karabağlar Aşık Veysel neighborhood in 2006 as a facility to build spare parts for automotive and agricultural machinery. In 2006, the project and installation installation formed the transition to prosthesis and plaque creation.

Since 2006, we have been serving the health sector by improving our way by repairing all kinds of medical parts. It is manufactured with the precision that will be deducted from the processing price. Anatomically appropriate background.
